

EcoStore

Assigned to : **Srinu Chapala**

Due Date:23/07/2024

Feature Description:

Basic Level:

1. Header:

- Create a header with "EcoStore" as the logo
- Add a navigation menu with: Home, Products, About Us
- Use an earth-toned background color

2. Hero Section:

- Headline: "Shop Sustainably, Live Responsibly"
- Subheadline: "Eco-friendly products for a greener lifestyle"
- Add a "Shop Now" button
- Use a nature-themed background image

3. Product Categories:

- Create four boxes representing different categories
- Each box should have an icon, category name, and brief description
- Categories: Home, Beauty, Fashion, Outdoors

4. Footer:

- Copyright text: "© 2024 EcoStore. All rights reserved."
- Add social media icons (just placeholders, no links needed)

Good Level (includes Basic, plus):

5. Featured Products:

- Create a "Best Sellers" section
- Display 3 products with image, name, price, and "Add to Cart" button
- Arrange them in a row

6.Sustainability Pledge:

- Add a short paragraph about the company's commitment to sustainability
- Include a small leaf icon or another eco-friendly symbol

7. Basic Styling:

- Use a green and white color scheme
- Add appropriate spacing between sections
- Ensure text contrasts well with backgrounds

Advanced Level (includes Good, plus):

8. Simple Responsive Design:

- Make the product categories stack in a 2x2 grid on smaller screens
- Adjust the hero section for better mobile viewing

9. Hover Effects:

- Add a subtle zoom effect on product images when hovered
- Change button colors on hover

10. Newsletter Signup:

- Create a simple form with an email input and "Subscribe" button

Backend & Database:

Use Spring boot and MySQL to add functionality to the application.

"Let's push our creativity and add more functionality to the website—every feature you enhance adds to your task evaluation!"

Points to be Noted:

This file contains the textual wireframing and styling suggestions for your task. So please feel free to better it according to your imagination, without leaving out any features defined above.

Your task evaluation would be based on the features you've completed from Basic, Good and Advanced sections according to the description above.

Submission details will be informed shortly
